

1965

AGRICULTURAL CROP REPORT

DEPARTMENT OF AGRICULTURE

P. O. BOX 2015 — MODESTO, CALIFORNIA

TO THE STATE DIRECTOR OF AGRICULTURE
THE HONORABLE BOARD OF SUPERVISORS
THE CHIEF ADMINISTRATIVE OFFICER

Gentlemen:

We herein present Stanislaus County's Agricultural Crop Report for 1965. This is the first time for several years that the income for farm crops has shown a decline. This was approximately a two million dollar decline from the previous 1964 income.

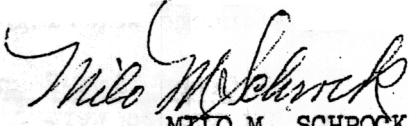

It will be noted in reading this report that there was a large drop in the peach and grape incomes. Livestock, dairying and poultry increased and this offset some of the losses. A serious loss to this group of farmers was an approximate twenty percent in the peach income due to bad weather conditions during harvest.

Again we want to remind you that these are gross figures and do not represent the net income to the farmers.

We wish to thank all of the irrigation districts, business firms and individuals who cooperated with us by furnishing information which made the compilation of this report possible. We also thank the members of the Agricultural Extension Staff and the Agricultural Commissioner's Staff.

Respectfully submitted,

ARMEN V. SARQUIS
Stanislaus County
Director of Extension

MILO M. SCHROCK
Stanislaus County
Agricultural Commissioner

Peas - - Pea acreage was almost double that of 1964. Yields were slightly better, prices stable. There was sizeable increase in gross income.

Red Clover - - Acreage and yields were better. Prices were one half cent lower. Gross income was up slightly.

Miscellaneous - - Acreage and value were up slightly. Gross income was up slightly.

VEGETABLE CROPS

Vegetable acreage was up in 1965. Gross income was up almost \$3,000,000. It was, on the overall, a good year.

Tomatoes - - Total acreage was down only slightly, yields were down slightly also. Prices were much better resulting in an increase in gross income of almost \$2,500,000. The absence of braceros was felt in acreage reductions, however, machine picked fields had a better than anticipated yield. The cost of picking was probably up from 1964, but this is not shown as these are gross and not net values.

Watermelons - - Acreage decreased slightly, however, yields were much better. On the average, prices were less but gross income was better than 1964.

Cantaloupes - - Acreage declined again this year. Yields were down slightly. Prices were slightly better. Gross income was off slightly.

Honeydews - - Acreage was down some. Prices and yields were better. Gross income was down slightly.

Other Melons - - Acreage was down, yields were down. Although prices were up, overall gross income was down.

Peas - - Acreage increased one third. Yields and prices were down slightly resulting in a small decrease in gross income.

Spinach - - Acreage was down. Yields were up. Prices were stable. Gross income was slightly down.

Green Lima Beans - - Acreage was up one third. Yields were down slightly, but prices were a little better. Gross income was up significantly.

Onions - - Acreage and yields were up. Prices were down slightly. Gross income was up over 2 per-cent.

Lettuce - - Acreage was down over 50 per-cent. Yields, prices, and gross income were up.

Peppers - - Acreage was up slightly. Yield and prices were down. Gross income was down over 10 per-cent.

Cole Crops - - Acreage was up almost 100 per-cent on cauliflower. Broccoli was stable. Yields on cauliflower were better, broccoli was stable. Both prices were up. Broccoli gross income was up slightly, cauliflower was up over 100 per-cent.

Snap Beans - - These figures are included in miscellaneous in 1965. Acreage was up 25 per-cent. Yields were down slightly. Prices were a little better. Gross income was up approximately \$50,000.

FRUIT AND NUT CROPS

Acreages devoted to fruit and nut crops continue to gain. There is an indication that the walnut and almond acreages are beginning to level off. Apricot planting will continue. We did not have a pear crop this year due to insect losses and poor pollination. Peach income was down drastically due to early fall rains and subsequent development of brown rot. Grape income was also down. Other fruits were fairly stable.

Almonds - - Bearing acreage continues to rise. Yields and prices were down. Gross income was down.

Apricots - - Bearing acreage increased. Yields and prices were down. Gross income was down considerably.

Bushberries - - Acreage, prices and yields were up slightly. Gross income was very favorable.

Grapes - - This was a bad year for grapes. Acreage increased, however, very slightly. Yields were up considerably, prices down considerably. Gross income was down approximately \$1,000,000.

Clingstone Peaches - - Bearing acreage was down slightly. Yields were very low due to brown rot damage. Prices were better, however, there was a major decrease in gross income.

Freestone Peaches - - Bearing acreage was fairly stable. Yields and prices were down, gross income was down considerably.

Nectarines - - Bearing acreage was stable. Yields, prices and gross income were down slightly.

Strawberries - - Bearing acreage was up, yields were stable. Prices were considerably better with gross income up substantially.

Walnuts - - Bearing acreage continues to increase. Yields were down slightly. Prices were down some also. Gross income was down approximately \$500,000.

Pears - - There was no 1965 crop. There should be a good income next year.

LIVESTOCK AND POULTRY

Beef Cattle - - Cattle and calves on feed increased slightly. Prices were better resulting in a considerable increase in gross income.

Swine - - Pig numbers decreased. Prices were better and gross income was up.

Sheep - - Small increases in numbers and prices resulted in a small increase in gross income.

Horses and Mules - - A small increase in numbers resulted in a small increase in gross income. Prices remained the same.

Dairying - - A reversal of the trend was evident to a small degree. Grade A milk production was down slightly. Prices were better and gross income was up. Manufacturing milk production was up. Prices were better. Gross income was up.

Poultry and Poultry Products - - Poultry income generally was up with the exception of heavy turkeys and market eggs. Heavy turkey production was down almost 50 per-cent. All other production was up. The overall gross income for poultry and poultry products was very favorable. However, prices on market eggs were down slightly with prices for all other poultry products stable or better.
