TAC AND COMMUNITY FEEDBACK

- A community meeting was held on January 10, 2024, at the Snelling Community Center.
- Property owners voiced concerns about our initial determination of benefits received by non-irrigated parcels from ETSGSA's services.
- At a January 16th special TAC meeting, the possibility of altering the rates was discussed.
- Based on community feedback, the TAC expressed that a lower rate for non-irrigated parcels was likely appropriate.
- On January 25, the Board approved lowering the non-irrigated parcel rate by approximately 40%.

BENEFIT FACTORS

Improved Water Supply Management (65%)

- Based on improved management of water resources within ETSGSA.
- Effective management improves availability and resilience of all water sources.
- Avoidance of undesirable results due to lowering of groundwater levels, reduction of groundwater storage, depletion of interconnected surface water, degradation of water quality, and land subsidence.

Effective SGMA Compliance (35%)

- Avoidance of State intervention; maintaining local control.

LAND USE FACTORS

Improved Water Supply Management

- Irrigated parcel acres assigned a score of 100
- Non-irrigated parcel acres assigned a score of **8** – roughly 1/12 benefit of irrigated parcels.

Effective SGMA Compliance

- Irrigated parcel acres: 100
- Non-irrigated parcel acres assigned a score of **10** – 1/10 benefit of irrigated parcels.
