C. E. D I X O N
CHIEF ADMINISTRATIVE OFFICER

TO THE STATE DIRECTOR OF AGRICULTURE
THE HONORABLE BOARD OF SUPERVISORS
THE CHIEF ADMINISTRATIVE OFFICER

Gentlemen:

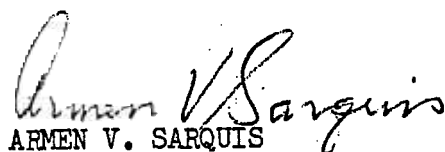

We are very pleased to present the 1964 record high Agricultural Crop Report for Stanislaus County. It will be noted the county once more is showing a larger total value in production than in any previous year. A record breaking high of \$167,747,680 is a gain of \$9,196,571 over the previous high shown in the 1963 report.

This report covers the acreage production and value of all crops produced and the value of all livestock and poultry products sold during the year. Also shown in this report are the acreages of bearing and non-bearing permanent crops. The figures include a tabulation of all new plantings and pull-outs to January 1, 1965.

The figures shown are gross income and do not represent net income to the farmers.

We wish to thank all of the irrigation districts, business firms, and individuals who cooperated with us by furnishing information which made the compilation of this report possible. Also, the members of the Agricultural Extension Staff and the Agricultural Commissioner's Staff.

Respectfully submitted,

ARMEN V. SARQUIS
Stanislaus County
Director of Extension

MILO M. SCHROCK
Stanislaus County
Agricultural Commissioner

FIELD CROPS

Alfalfa - - Total acreage declined. Yields were much the same but prices were lower, bringing a net decrease for this crop.

Dry Beans - - Total acreage declined again this year. Prices were down for all varieties except large limas. Acreages declined for all varieties except blackeyes. Yields of all varieties except blackeyes were down slightly. Gross tonnage was down as well as gross returns for all beans as a class.

Grain - - Barley, corn, and oats declined in acreage. Wheat and rice acreage remains the same. Milo acreage gained slightly. Yields were more or less stable. Prices fluctuated somewhat, but gross prices were average.

Field Corn - - Acreage was down. Yields and prices up. Gross revenues down slightly for 1964 crop. Silage corn shows a slight increase in acreage and price resulting in a larger gross income.

Cotton - - Acreage up again about 50 per cent. Yields were better and prices up a cent over 1963. Gross income up nearly 50 per cent.

Irrigated pasture - - Acreage and rents more or less stable. Income stable.

Sugar Beets - - Acreage shows nearly a 25 per cent increase. Yields down slightly, prices stable resulting in a sizeable increase in gross returns.

Field crops as a class showed an over-all drop in total acreage. This was due primarily to a shift to vegetable and fruit and nut crop acreage. Acreage was down below the 1963 level, but income was not down as low as 1962 considering the decrease in acreage, gross income was favorable.

SEED PRODUCTION

Alfalfa - - Certified production increased slightly. Yields were better, but prices slightly lower. Common alfalfa acreage was much the same as the previous year, yields better. Over-all, alfalfa seed production income was up.

Peas - - Pea acreage was up approximately 20 per cent. Yields were down slightly. Gross income up a small amount.

Red Clover - - Acreage up, yields and prices down. Slight increase in gross income.

Miscellaneous - - Acreage up slightly. Income down. Gross revenue down slightly.

VEGETABLE CROPS

Vegetable crops were up in acreage a small amount, but gross revenue was down.

Tomatoes - - Tomato acreage down. Fresh tomatoes did not fare too well. Late planted acreages were damaged by early frost and rain. Canning acreages were plagued with harvesting difficulties. Prices were much the same, yields were slightly better, but gross income was off some. A drastic reduction in acreage may take place in 1965.

Watermelons - - Acreage declined slightly. Tonnage and prices were up. Gross income up.

Cantaloupes - - Acreage up slightly, yields and prices down slightly. Gross income down slightly.

Honeydews - - Acreage up slightly, yields and prices down. Gross income down.

Other melons - - Acreages decreased. Persian yield somewhat better, other yields down. Prices slightly lower resulting in lower over-all gross income.

Peas - - Acreage yield and prices all increased slightly. Gross income up.

Spinach - - Acreage yield and prices up. Gross income up about 40 per cent.

Green Lima Beans - - Acreage considerably increased. Yields and prices slightly lower. Gross income up 20 per cent.

Onions - - Acreage up, yields slightly down. Prices more favorable. Gross income up over 100 per cent.

Lettuce - - Head lettuce acreage decreased. Yields stable, prices somewhat lower. Gross income down slightly.

Peppers - - Acreage down slightly, yields down some. Prices much more favorable resulting in a small increase in gross returns.

Cole Crops - - Acreage decreased for 1964. Yields much the same, prices stable. Gross income down.

Snap Beans - - A new item. Formerly included in Miscellaneous Vegetables. An important addition to the vegetable picture.

FRUIT AND NUT CROPS

Fruit and nut tree acreages continue to grow. Most of the acreage increase is due to continued heavy planting of almonds, walnuts and apricots on the west side. In the near future our new plantings of pears will become a factor in the gross receipts from fruit and nut crops. Bushberries may increase in the near future. Olives continue a slow decline in acreage. All the other major fruit and nut crops are stable or show a slight increase.

Almonds - - Bearing acres, yields and prices all up. Gross income up a sizeable amount.

Apricots - - Apricots account for a sizeable increase in the fruit and nut gross income increase. Acreages, yields and prices all up. Gross returns up considerably.

Bushberries - - Acreage and yields declined slightly, but were off-set by an increase in price. Gross income up slightly.

Grapes - - Total revenue up slightly. Wine grapes accounted for the bulk of the gross returns. Raisin and table varieties more or less stable.

Clingstone Peaches - - Cling peaches were a good crop again in 1964. Yields and prices slightly better. Gross income up.

Freestone Peaches - - Yields and prices again were favorable. Gross income up.

Nectarines - - Acreage up slightly, yields much the same. Prices were a little better, gross sales up slightly.

Strawberries - - Acreage fairly constant, yields and prices better, gross income up.

Walnuts - - Acreage and prices up, yields stable. Gross returns up substantially. A good year for walnuts.

Pears - - An estimated production of 713 tons brought in a small return to growers in 1964. Only about 20 per cent of our acreage is considered of bearing age. Income included under Miscellaneous for 1964.

LIVESTOCK AND POULTRY

Beef Cattle - - Numbers of cattle and calves on feed continue to increase but prices continue downward. A slight over-all decrease in gross revenue results

Swine - - Pig numbers show a slight increase. Prices stable resulting in an over-all increase in gross returns.

Sheep - - Increase in numbers and prices resulted in an over-all increase in gross income. Wool returns were down due to decrease in amount and lower price.

Horses and Mules - - Total number of horses in the county continues to grow. Prices are on the increase. Gross income continues to increase.

Dairying - - Milk cow inventory continues to decline. Market milk increased again in volume and price. Manufacturing milk decreased in volume and increased in price. Gross returns for market milk up substantially. Manufacturing milk income declined.

Poultry and Poultry Products - - Poultry income still on the increase in spite of lower prices for other chickens, fryers, and chicks, and heavy turkeys. Prices for eggs, both hatching and market, a little better. Production on all, but chicks and hatching eggs, increased. Gross income up a substantial amount.

1964 PERMANENT CROP ACREAGES - COMPLETED RESURVEY
