L: TREE HOLE FUMIGATION

This permit condition pertains to the use of fumigants for the replanting of individual vine or tree sites.

California Fumigant Management Plan
The California Fumigant Management Plan (CA FMP) must be completed and be on-site during the application and post-application monitoring.

Site Map
Permit applications must include a map or description of all occupied structures and bystander areas within 1/4 mile of the fumigation site and all schools and difficult to evaluate sites within 1/2 mile of the fumigation site. The map should include all buildings and structures on site. The map should clearly identify the location of the tree holes closest to any structure or sensitive area and distance of these tree holes to the structure or sensitive area.

Notice of Intent
A Notice of Intent (NOI) must be submitted at least **96** hours prior to an application. For Monday applications, submit all requirements by Tuesday prior. Include a detailed map showing exact distances to sensitive sites and occupied structures that are within a ¼ mile of the application site. The CAC may require more than or allow less than 96 hours' notice if it is determined that 96 hours are not adequate or necessary to adequately evaluate the intended application and to determine necessary mitigation measures. In addition to the information required in 3 CCR 6434(b), the following information must be submitted with the NOI:

- □ Must be submitted to Stanislaus County 96 hours prior to the proposed application date. For fumigations proposed for a Monday, the NOI must be received by Tuesday prior.
- □ Must identify the Product Name and EPA Reg. No.
- □ Must specify the Fumigation Method and number of tree holes per application site.
- □ Must include Calculations outlining the Broadcast Equivalency Rate (e.g. Treatment Width, Row Spacing, Percentage of Active Ingredient)
- □ Must include ALL applicable signed Vacate Agreements* with neighboring property operators.
- □ Must include Maps of the application site identifying the following:
  - Distances to all structures/sensitive sites/difficult to evacuate sites
  - Setback distances from occupied structures
  - Outline of area within the field where setbacks will be maintained.
  - Structures with Vacate Agreements must be referenced.
  - Permit Number and Site Identification Number
  - Treatment Blocks and Acreage
- □ Must include a copy of the Pest Control Recommendation

School Properties
When a schoolsite (public or private), Kindergarten through 12th grade, is within 1/4 mile (1320 feet) of a fumigation block, the injection must be completed 36 hours prior to the start of a school session. School sessions refer to the times when students attend scheduled classes.

Field Conditions

The following field conditions must be met at the time of NOI Submission:

- □ Soil moisture and temperature in compliance with Appendix J and/or Appendix K and/or Label requirements
- □ Free of debris and in good tilth (Ready for application)
- □ Setbacks within the field must be flagged/marked

Site-Specific Permit Conditions

Applications of Chloropicrin and/or 1,3-Dichloropropene may not proceed until site-specific permit conditions have been issued and approved by the Stanislaus County Agricultural Commissioner's Office.

All of the label directions must be followed in addition to these permit conditions.
